Selling your idea

The proxy is has many features like being a proxy and waits out queue like a proxy does. It also has many other modules that proxies have

And don't trust the brown people proxy because brown people steal things and smoke crack so your details are not safe in there hands

1. Intro

Choose one approach to grab the audience's attention right from the start: unexpected, emotional, or simple.

→ **Unexpected**

Highlight what's new, unusual, or surprising.

→ **Emotional**

Give people a reason to care.

→ **Simple**

Provide a simple unifying message for what is to come

CProxy is the best of both worlds **cheap and packed** with the best features

Tip

In this example, we're leading off with something **unexpected**.

While the audience is trying to come up with a number, we'll surprise them with the next slide.

Hail donfuer! I guess

There's are many features of the proxy like the gay masons had such as chunk editing, chunk cut-off and lots of other featurus like good features.

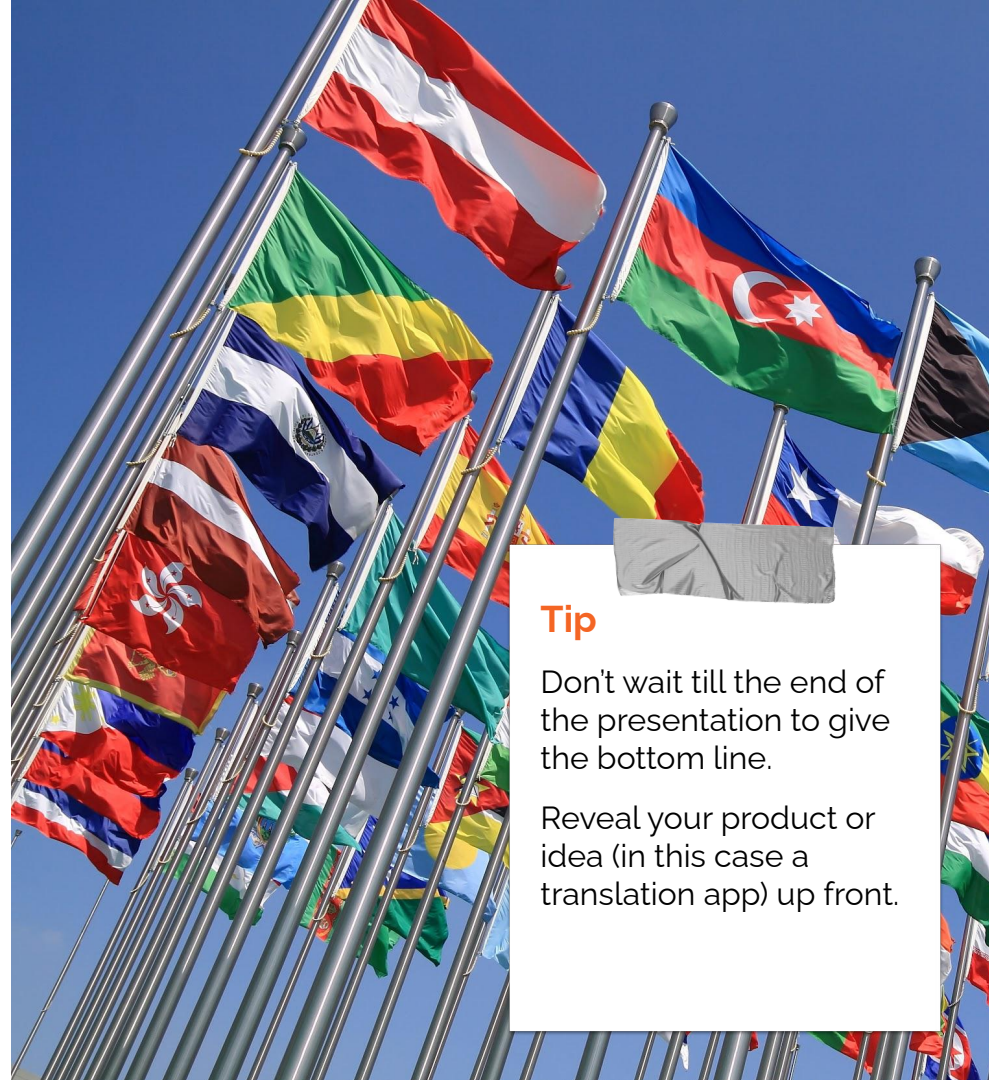

Tip

Remember. If something sounds like common sense, people will ignore it.

Highlight what is unexpected about your topic.

You cannot go wrong when investing in the proxy created for donfurians

CProxy the retard friendly version of the premium shit the real guys get

Tip

Don't wait till the end of the presentation to give the bottom line.

Reveal your product or idea (in this case a translation app) up front.

2. Examples

By the end of this section, your audience should be able to visualize:

- **What**
I have queue skip
- **Who**
I have 6h kick bypass

the middle of fuck all in
